TRIBAL-ISAC
INFORMATION SHARING & ANALYSIS CENTER

ABOUT

The Tribal Information Sharing and Analysis Center (Tribal-ISAC), a division of not-for-profit Tribal Share, Inc., is a platform for cyber threat information sharing, threat prevention, protection, community response, and a managed and trusted collaboration with other government agencies for the nation's tribal governments and their operations and enterprises.

It is a resource, created by tribes for tribes, that not only promotes the improvement of their cybersecurity posture but also their sovereignty through confidential information sharing with a community of trusted peers.

The Tribal-ISAC, a 501(c)(3), provides a safe and secure environment for the nation's federally recognized sovereign Native American tribal governments, all of their operations and enterprises, including Alaska Native communities, villages and organizations ("Tribe(s)"), to share and mitigate security threat information, to share best practices, and is the conduit for security information sharing among Tribes.

DIRECT MEMBER BENEFITS INCLUDE:

◆ Secure access to the trusted collaboration portal and Tribal-ISAC platform.

◆ Access to, and collaboration with, security-minded peers from tribes across the nation.

◆ Daily automated tribe-specific threat information with actionable insights delivered directly to members inbox.

◆ Monthly reports designed to improve security posture across members organizations.

◆ Access to new resources from the Tribal-ISAC's shared funding model.

◆ Access to information received from Tribal-ISAC's federal, state, and commercial information sharing partners.

Collective Defense:

By joining Tribal-ISAC, members become part of a larger network where information about threats, vulnerabilities, and mitigation strategies SPECIFIC TO TRIBES AND TRIBAL ENTERPRISES is shared. This collective intelligence strengthens our collective defense, making it harder for attackers to find and exploit weaknesses.

Access to Critical Resources:

Tribal-ISAC provides its members with timely alerts, threat analysis, and access to cybersecurity experts. These resources are invaluable in staying ahead of potential threats and ensuring your systems are protected with the latest defenses.

Advocacy and Support:

As a member of Tribal-ISAC, tribes gain a voice in cybersecurity advocacy. This collective voice is powerful in influencing policy and securing support from government and industry stakeholders to address our unique challenges.

40% of tribes report they don't have at least 1 dedicated cybersecurity resource.

INFORMATION SHARING HAS NEVER BEEN MORE CRITICAL IN INDIAN COUNTRY.
